SUBJECT INDEX, VOLUME 21

A

PAGE

Absorption, of alachlor in yellow nutsedge 357
Absorption of herbicides, by soybean seed 71
Absorption of pyrazon, in sugar beets 241
Absorption of 2,4,5-T, applied in various carriers to honey mesquite 94
Absorption of terbutryn and propazine 440
Acetanilides, effects of soil organic matter on 157
Achenes, changes during low temperature after-ripening 310
Action, of 2,4-D and dicamba in trumpetcreeper 429
Activated carbon bands and herbicides, grass seed crops established with 537
Activated carbon, influence on persistence of atrazine 204
Activity of acetanilides, CDAA, and atrazine, effects of soil organic matter on 157
Additives, effects on phenmedipham for weed control in sugarbeets 67
Adsorption of bentazon, in Illinois soils 224
Adsorption, of chlorbromuron in soil 416
After-ripening, changes in fumitory achenes during 310
Agriculture and the environment, improvement of 379
Alachlor absorption, translocation, and metabolism, by yellow nutsedge 357
Alachlor and carbofuran, interaction of 330
Alachlor, control of yellow nutsedge with 354
Alachlor, effect on carbofuran distribution and metabolism in barley and corn 360
Algae, biotic interactions between different species of 32
Algae, effects of metribuzin and two analogs on 173
Alfalfa and weeds, hay quality 490
Alfalfa, common chickweed control in 119
Amine salt formulations of 2,4-D, penetration into sunflower 115
Amino acids and 2,4-D, effects on field bindweed in vitro ... 135
Anatomy, of yellow nutsedge tubers 501
Annual weeds and sweet Spanish onions, competition between 436
Annual weeds, effect on furrow-irrigated cotton 325
Annual weeds, periodicity of germination and emergence of 574
Antidotes of EPTC, comparative effects of 292
Application of selected herbicides, revegetation following ... 409
Aquatic organisms, effects of diquat plus copper sulfate on .. 249
Aquatic weeds, evapotranspiration of 197
Aqueous emulsions, crystallization of phenmedipham from .. 6
Arsenic acid, determinations in plants 166
Arsenic phytotoxicity, in vegetable crops 524
Atrazine and suspension fertilizer compatibility 217
Atrazine, 2,4-D, and dalapon mixtures, effects on conifers ... 269
Atrazine, diffusion in a silt loam soil 381
Atrazine, effects of soil organic matter on 157
Atrazine, influence on free fatty acid content in isolated chloroplasts 57
Atrazine, performance and persistence of 413
Atrazine, persistence in sand 204
Atrazine-phosphate combinations, enhanced phytotoxicity of . 37
Atrazine plus propachlor, with tillage variables in corn 106
Atrazine, proso millet tolerance to 260
Auxin-like herbicides, effects on nucleohistones in roots 181

B

Bacillus, effect of herbicides on the growth of 449
Banded atrazine plus propachlor, in corn 106
Barley, butylate and carbofuran interaction in 339
Barley, carbofuran distribution and metabolism in 360
Barley, chlorbromuron-carbofuran interaction in 335
Barley, fate of picloram in 350
Bearded iris, chemical weed control in 258
Benazolin, selectivity of 45
Benazolin, translocation and metabolism of 48
Benefin and DCPA, effect on grasses maintained as putting greens 528
Benefin, volatility and photodecomposition of 469

PAGE

Bentazon mobility, in Illinois soils 224
Benzyladenine, bud sprouting and growth of purple nutsedge altered by 19
Bioactivity of herbicides, effect of gamma radiation on 281
Biological control, of northern jointvetch in rice 303
Biotic interactions, between different species of algae 32
Black seed of halogeton, pregermination treatment of 125
Broadcast atrazine plus propachlor, with tillage variables in corn 106
Bromacil and picloram, under southern upland hardwoods .. 54
Bromacil, effects on Kentucky bluegrass and orchardgrass .. 212
Bromoxynil, for control of cocklebur and wild sunflower in soybeans 103
Bud sprouting and growth, of purple nutsedge altered by benzyladenine 19
Butylate and carbofuran interaction, in barley and corn 339
Butylate, effect on carbofuran distribution and metabolism in barley and corn 360
Butylate injury, to corn hybrids 194

C

Canada thistle ecotypes, lipid deposition on leaves of 169
Canada thistle, fate of picloram in 350
Canada thistle, herbicidal activity and metabolism of dyrene in 389
Carbofuran and alachlor, interaction of 330
Carbofuran and butylate interaction, in barley and corn 339
Carbofuran-chlorbromuron interaction, in corn and barley .. 335
Carbofuran distribution and metabolism, in barley and corn.. 360
Carbaryl, enhancement of foliar activity of linuron with 465
CDAA, effects of soil organic matter on 157
Chemical fallow, in a winter wheat-fallow rotation 97
Chloramben methyl ester, variability in cucumber for tolerance to 207
Chlorbromuron, adsorption in soil 416
Chlorbromuron-carbofuran interaction, in corn and barley .. 335
Chlorbromuron, degradation in soil 416
Chlorbromuron, effect on carbofuran distribution and metabolism in barley and corn 360
Chlorella, effect of herbicides on the growth of 449
Chloroplasts, influence of simazine and atrazine on the fatty acid content of 57
Combine, soybean harvesting losses 520
Commercial herbicides, influence on corn oil composition ... 433
Common chickweed control, in established alfalfa 119
Common cocklebur, control with bromoxynil in soybeans ... 103
Common dandelion, seasonal variation in flowering of 230
Common groundsel, mechanism of resistance to simazine in .. 497
Common milkweed seed maturation 568
Common purslane, response to dicamba 385
Compatibility, of atrazine and suspension fertilizer 217
Competition, between annual weeds and sweet Spanish onions 436
Competition in soybeans, venice mallow 89
Competition of wild cane and forage sorghum, in grain sorghum 28
Conifers, effects of atrazine, 2,4-D, and dalapon mixtures on 269
Control of chickweed, in established alfalfa 119
Control, of galinsoga 41
Control of johnsongrass, with dalapon and preemergence herbicides 426
Control of johnsongrass, with soil incorporated herbicides ... 474
Control of kochia, in sugarbeets 110
Control of northern jointvetch, in rice 303
Control of nutsedge, with alachlor 354
Control, of wild watermelon 570
Control of woody plants, with herbicide mixtures 423
Controlled release, of herbicides 1
Copper sulfate plus diquat, effects on aquatic organisms 249
Corn, atrazine plus propachlor with tillage variables in 106
Corn, butylate and carbofuran interaction in 339

PAGE

Corn, carbofuran distribution and metabolism in 360
Corn, chlorbromuron-carbofuran interaction in 335
Corn, control of johnsongrass in 474
Corn, cytological effects of ultra-high temperatures on 299
Corn hybrids, differential butylate injury to 194
Corn oil composition, influence of herbicides on 433
Corn, physiological effects of ultra-high temperatures on 296
Cottn, effect of annual weeds on 325
Cotton, fluometuron-disulfoton interactions in 275
Cotton, response to several herbicides 327
Cotton, weed control in 402
Crop plants, ozone-herbicide interactions in 508
Crop protectants, reducing herbicide injury to sorghum with 531
Cropping and activated carbon, influence on persistence of atrazine 204
Crystallization of phenmedipham, from aqueous emulsions .. 6
Cucumber roots, effects of auxin-like herbicides on nucleohistones in 181
Cucumber, variability for tolerance to chloramben methyl ester 207
Cultivation, responses of peach trees to 227
Cytological effects, of ultra-high temperatures on corn 299

D

2,4-D, action and fate of 429
2-4-D and amino acids, effects on field bindweed in vitro ... 135
2,4-D, dalapon, and atrazine mixtures, effects on conifers ... 269
2,4-D, effects on seedling progeny of soybeans 141
2,4-D, penetration into sunflower 115
2,4-DB, effects on seedling progeny of soybeans 141
Dalapon, atrazine, and 2,4-D mixtures, effects on conifers ... 269
Dalapon, for johnsongrass control in soybeans 426
Dalapon, tolerance of two sugarcane cultivars to 139
Dandelion, seasonal variation in flowering of 230
DCPA and benefin, effect on grasses maintained as putting greens 528
Degradation, of chlorbromuron in soil 416
Degradation, of dicamba, picloram, and phenoxy herbicides in soils 556
Degradation, of two phenyl pyridazinone herbicides 314
Delayed incorporation, of trifluralin and nitralin 163
Determination of MSMA and arsenic acid, in plants 166
Development, of galinsoga 41
Diallate, effects on foliar uptake and translocation of herbicides 16
Diazinon, diffusion in a silt loam soil 381
Dicamba, action and fate of 429
Dicamba, degradation in soils 556
Dicamba, dissipation from grassland soils 393
Dicamba, effects on seedling progency of soybeans 141
Dicamba, response of common purslane to 385
Diffusion coefficients, prediction of 485
Diffusion, concentration of pesticides slowly released by 343
Diffusion, of atrazine, propachlor, and diazinon in a silt loam soil 381
Diffusion of trifluralin, in silt loam soil 480
Dinitroaniline herbicides, field comparison of 512
Dinitroaniline herbicides, relative phytotoxicities of 517
Dioscorea species, weed control in new plantings of 263
Diphenamid metabolism, alteration in tomato by ozone 542
Diquat plus copper sulfate, effects on aquatic organisms 249
Disappearance of picloram from soil, measurement and prediction of 549
Disease, control of northern jointvetch with 303
Dissipation of dicamba, from grassland soils of Texas 393
Distribution of carbofuran, in barley and corn 360
Disulfoton fluometuron interactions, in cotton 275
Ditchbank grasses, response to herbicides 421
Drift, of low-expansion foams and conventional sprays 405
Drought, weed seed germination under 322
Dyrene in Canada thistle, herbicidal activity and metabolism of 389

E

Ecotypes of Canada thistle, lipid deposition on leaves of 169
Emergence and control, of wild watermelon 570
Emergence, of annual weeds 574
Emulsified oils, for weed control in cotton 402
Endemic fungal disease, control of northern jointvetch with .. 303

PAGE

Endothall uptake, by hydrilla 446
Endothall uptake, factors affecting 446
Enhancement of foliar activity of linuron, with carbaryl 465
Enhancement of herbicides, by silicone surfactants 130
Environment, improvement of 379
EPTC antidotes, comparative effects of 292
Evapotranspiration, of some aquatic weeds 197

F

Fallow-winter wheat rotation, chemical fallow in 97
Fate of 2,4-D and dicamba, in trumpetcreeper 429
Fate of picloram, in Canada thistle, soybean, and barley 350
Fatty acid content in isolated chloroplasts, influence of simazine and atrazine on 57
Fenac, factors influencing release of 318
Fenac, tolerance of sugarcane cultivars to 139
Field bindweed in vitro, effects of 2,4-D and amino acids on 135
Field comparisons, of twelve dinitroaniline herbicides 512
Flowering of common dandelion, seasonal variation in 230
Fluometuron-disulfoton interactions, in cotton 275
Foams and sprays, drift of 405
Foliar activity of linuron, enhancement with carbaryl 465
Foliar uptake and translocation, of herbicides in peas 16
Forage sorghum and wild cane competition, in grain sorghum 28
Forest nurseries, preemergence weed control in 363
Foxtail control, in wheat 238
Fruit of puncturevine, a soil profile analysis for 504
Fumitory achenes, changes during low temperature afterripening 310
Fungal disease, control of northern jointvetch with 303
Furrow-irrigated cotton, effect of annual weeds on 325

G

Galinsoga, germination, growth, development, and control of 41
Gamma radiation, effect on bioactivity of herbicides 281
Germination and emergence, of annual weeds 574
Germination, of galinsoga 41
Germination of seed, *s*-triazine effects on 461
Germination of tall morningglory, response to herbicides and temperature 443
Germination of weed seed, under simulated drought 322
Grain sorghum, wild cane and forage sorghum competition in 28
Granules in soil, micromovement of propachlor from 185
Grass seed crops, established with activated carbon bands and herbicides 537
Grasses, effect of benefin and DCPA on 528
Grasses, response to herbicides 421
Grassland soils, dissipation of dicamba from 393
Green foxtail control, in wheat 238
Growth and sprouting, of purple nutsedge altered by benzyladenine 19
Growth inhibition of soybean 455
Growth, of chlorella and bacillus 449
Growth, of galinsoga 41
Growth, of rice and weeds 61

H

Halogeton, pregermination treatment of black seed of 125
Hardwoods, bromacil and picloram under 54
Harvesting losses, influence of weeds on 520
Hay quality, affected by weeds 400
Hemp broomrape, herbicide effects on parasitism of tomato by 253
Herbicidal activity, of dyrene in Canada thistle 389
Herbicidal naphtha, for weed control in cotton 402
Herbicidal potential, of rhizobitoxine 63
Herbicide absorption, by soybean seed 71
Herbicide action, lipid metabolism as a site of 477
Herbicide and activated carbon bands, grass seed crops established with 537
Herbicide behavior in woody plants, effects of surfactants and pH on 221
Herbicide-induced growth inhibition, of soybean 455
Herbicide injury, to sorghum with crop protectants 531
Herbicide mixtures, control of woody plants with 423
Herbicide-ozone interactions, in crop plants 508
Herbicide response, of interspecific sowthistle crosses 189

PAGE

Herbicides, differential response of ditchbank grasses to 421
Herbicides, dinitroanilines 512, 517
Herbicides, effect of gamma radiation on bioactivity of 281
Herbicides, effect on chlorella and bacillus 449
Herbicides, effects of diallate on foliar uptake and translocation of 16
Herbicides, effects on nucleohistones in roots 181
Herbicides, enhancement by silicone surfactants 130
Herbicides, expensive to produce 374
Herbicides, for johnsongrass control in corn 474
Herbicides, for johnsongrass control in soybeans 426
Herbicides, influence on corn oil composition 433
Herbicides, period of controlled release 1
Herbicides, response of tall morningglory germination to ... 443
Herbicides, response of yellow nutsedge and cotton to 327
Herbicides, responses of peach trees to 227
Herbicides, soil degradation of 314
Herbicides, sorption by plant cells and protoplasts 145
Herbicides, revegetation following massive application of 409
Herbicides, weed control in soybeans with 81
Honey mesquite, absorption of 2,4,5-T in 94
Hydrilla, uptake of endothall by 446
3-Hydroxypropionanilide isopropylcarbamate, control of kochia in sugarbeets with 110
Hypocotyl hook opening, *s*-triazine effects on 461

I

Illinois soils, bentazon mobility and adsorption in 224
Incorporated herbicides, for johnsongrass control in corn ... 474
Incorporation, of trifluralin and nitralin 163
Incorporation technique, root plow herbicide application 128
Inhibition of soybean growth, assessment of 455
Injury from herbicides, to sorghum with crop protectants ... 531
Injury to corn hybrids, by butylate 194
Insecticides, interaction with propanil 246
Interaction, of alachlor and carbofuran 330
Interaction of butylate and carbofuran, in barley and corn .. 339
Interaction of chlorbromuron and carbofuran, in corn and barley 335
Interaction of propanil, with insecticides 246
Interactions, between different species of algae 32
Interactions in crop plants, of ozone-herbicide 508
Interactions of fluometuron-disulfoton, in cotton 275
Interactions with terbacil, of water-soil-plant 451
Interspecific sowthistle crosses, herbicide response and morphology of 189
Irrigated cotton, effect of annual weeds on 325

J

Johnsongrass control in corn, with soil incorporated herbicides 474
Johnsongrass control in soybeans, with dalapon and preemergence herbicides 426

K

Kentucky bluegrass, effects of bromacil on 212
Kochia control, in sugarbeets 110
Kochia densities, predicting sugar beet root losses with 565

L

Leaves of tall morningglory, nitrate reductase profiles in ... 561
Leucine uptake and incorporation, effects of light and prometryne on 24
Light and prometryne effects, on leucine uptake and incorporation 24
Linuron activity, enhancement with carbaryl 465
Lipid metabolism, as a site of herbicide action 477
Lipid deposition, on leaves of Canada thistle ecotypes 169
Low-expansion foams, drift of 405
Low temperature after-ripening, changes in fumitory achenes during 310

M

Matrices, factors influencing release of fenac from 318
MBR-8251, yellow nutsedge control with 122

PAGE

Measurement and prediction, of picloram disappearance from soil 549
Mechanism of resistance, to simazine in common groundsel . 497
Mechanism of trifluralin diffusion, in silt loam soil 480
Metabolism of alachlor, by yellow nutsedge 357
Metabolism of benazolin, in wild mustard and rape species .. 48
Metabolism of carbofuran, in barley and corn 360
Metabolism of diphenamid, alteration in tomato by ozone .. 542
Metabolism, of dyrene in Canada thistle 389
Metabolism of 2-(α-naphthoxy)-*N*,*N*-diethyl propionamide, in tomato 11
Metabolism of pyrazon in sugar beets, influence of temperature on 241
Metribuzin and two analogs, effects on five species of algae .. 173
Metribuzin, soybean tolerance to 308
Micromovement of propachlor, from granules in soil 185
Milkweed seed maturation 568
Mixtures of atrazine, 2,4-D, and dalapon, effects on conifers 269
Mixtures of herbicides, control of woody plants with 423
Mobility of bentazon, in Illinois soils 224
Morningglory seedlings, nitrate reductase profiles in 561
Morphology, of interspecific sowthistle crosses 189
Mowing, responses of peach trees to 227
MSMA, determinations in plants 166
Mucilaginous seed coats 52
Mulch, responses of peach trees to 227

N

2-(α-naphthoxy)-*N*,*N*-diethyl propionamide, metabolism in tomato 11
Nitralin, delayed incorporation of 163
Nitralin, persistence in soil 285
Nitralin, volatility and photodecomposition of 469
Nitrate reductase profiles, in leaves of tall morningglory 561
Nitrification, a rapid procedure to evaluate the effect of pesticides on 397
Northern jointvetch in rice, biological control of 303
Nucleohistones in roots, effects of auxin-like herbicides on .. 181
Nurseries, preemergence weed control in 363
Nutsedge, absorption, translocation, and metabolism of alachlor by 357
Nutsedge control, with alachlor 354
Nutsedge control, with MBR-8251 122
Nutsedge, response to several herbicides 327
Nutsedge, shoot emergence and longevity of 76
Nutsedge tubers, anatomy and sprouting of 501

O

Oils, for weed control in cotton 402
Onions and weeds, competition between 436
Orchardgrass, effects of bromacil on 212
Organic matter, effect on activity of acetanilides, CDAA, and atrazine 157
Overseeded grasses, effect of benefin and DCPA on 528
Ozone, alteration of diphenamid metabolism in tomato by .. 542
Ozone-herbicide interactions, in crop plants 508

P

Paper disc method, for evaluating the effects of herbicides .. 449
Parasitism of tomato by hemp broomrape, herbicide effects on 253
Peach trees, responses to herbicides, mulch, mowing, and cultivation 227
Peanuts, systems of weed control for 176
Peas, uptake and translocation of herbicides in 16
Penetration of 2,4-D, into sunflower 115
Performance, of atrazine 413
Periodicity of germination and emergence, of annual weeds .. 574
Persistence in soil, of nitralin and trifluralin 285
Persistence, of atrazine 413
Persistence of atrazine in sand, influence of cropping and activated carbon on 204
Pesticides on nitrification, a rapid procedure to evaluate the effect of 397
Pesticides, released by diffusion 343
pH and surfactant, effects on herbicide behavior in woody plants 221

	PAGE
Phenmedipham, crystallization of	6
Phenmedipham, effects of additives on	67
Phenoxy herbicides, degradation in soils	556
Phenyl pyridazinone herbicides, soil degradation of	314
Phosphate-atrazine combinations, enhanced phytotoxicity of	37
Phosphorus and trifluralin, effect on transplanted tomatoes	150
Photodecomposition, of trifluralin, benefin, and nitralin	469
Physiological effects, of bromacil on Kentucky bluegrass and orchardgrass	212
Physiological effects, of ultra-high temperatures on corn	296
Phytotoxicities of dinitroaniline herbicides	517
Phytotoxicity of arsenic, in vegetable crops	524
Phytotoxicity, of atrazine-phosphate combinations	37
Picloram and bromacil, under southern upland hardwoods	54
Picloram, degradation in soils	556
Picloram disappearance rates, measurement and prediction of	549
Picloram fate, in Canada thistle, soybean, and barley	350
Plant cells, sorption of some herbicides by	145
Plant protein content, action of simazine on	233
Plant species, early root and shoot development of	289
Plant-water-soil interactions, with terbacil	451
Planting date and tolerance to atrazine, of proso millet	260
Polyethylene matrices, factors influencing release of fenac from	318
Postemergence-directed herbicides, weed control in soybeans with	81
Prediction, of picloram disappearance from soil	549
Prediction, of trifluralin diffusion coefficients	485
Preemergence herbicides, for johnsongrass control in soybeans	426
Preemergence weed control, in southeastern forest nurseries	363
Pregermination treatment, of black seed of halogeton	125
Procedure, to evaluate the effect of pesticides on nitrification	397
Professional society, the role of	369
Prometryne effects, on leucine uptake and incorporation	24
Propachlor diffusion, in a silt loam soil	381
Propachlor micromovement, from granules in soil	185
Propachlor plus atrazine, with tillage variables in corn	106
Propanil, interaction with insecticides	246
Propanil, responses of soybean cultivars to	279
Propazine, absorption and translocation of	440
Proso millet, date of planting	260
Proso millet, tolerance to atrazine	260
Protectants, reducing herbicide injury to sorghum with	531
Protein content, action of simazine on	233
Protoplasts, sorption of herbicides by	145
Puncturevine fruit and seed, a soil profile analysis for	504
Purple nutsedge, bud sprouting and growth of	19
Purslane, response to dicamba	385
Putting greens, effect of benefin and DCPA on	528
Pyrazon in sugar beets, absorption, translocation and metabolism of	241
Pyridazinone herbicides, soil degradation of	314

R

Radiation, effect on bioactivity of herbicides	281
Rape and wild mustard, translocation and metabolism of benazolin in	48
Rape species and wild mustard, selectivity of benazolin in	45
Release of fenac, from polyethylene matrices	318
Release of fenac from polyethylene matrices, factors influencing	318
Release of pesticides, by diffusion	343
Resistance to simazine, in common groundsel	497
Response of common purslane, to dicamba	385
Response of ditchbank grasses, to herbicides	421
Response of yellow nutsedge and cotton, to several herbicides	327
Responses of soybean cultivars, to propanil	279
Revegetation, after massive application of selected herbicides	409
Rhizobitoxine, herbicidal potential of	63
Rice and weeds, soil water and growth of	61
Rice, biological control of northern jointvetch in	303
Rice plants, interaction of propanil with insecticides in	246
Role, of the professional society	369
Root development	289
Root losses of sugarbeets, based on kochia densities	565
Root plow herbicide application, as a new incorporation technique	128

S

	PAGE
Sand, persistence of atrazine in	204
Seasonal variation, in flowering of common dandelion	230
Seed coats, mucilaginous	52
Seed crops, established with activated carbon bands and herbicides	537
Seed germination, *s*-triazine effects on	461
Seed germination, under simulated drought	322
Seed maturation, of common milkweed	568
Seed of puncturevine, a soil profile analysis for	504
Seedling progeny of soybeans, effects of 2,4-D, 2,4-DB, and dicamba on	141
Seedlings of tall morningglory, nitrate reductase profiles in	561
Seeds in soil, toxicity of an UHF device to	161
Selectivity, of benazolin in wild mustard and rape species	45
Shoot development	289
Shoot emergence and longevity, of yellow nutsedge	76
Silicone surfactants, enhancement of herbicides by	130
Simazine, action in increasing plant protein content	233
Simazine, influence on free fatty acid content in isolated chloroplasts	57
Simulated drought, weed seed germination under	322
Site, of herbicide action	477
Soil, adsorption and degradation of chlorbromuron in	416
Soil degradation, of two phenyl pyridazinone herbicides	314
Soil, diffusion of atrazine, propachlor, and diazinon in	381
Soil, diffusion of trifluralin in	480
Soil granules, micromovement of propachlor from	185
Soil, interaction of propanil with insecticides absorbed from	246
Soil, nitralin and trifluralin persistence in	285
Soil organic matter, effect on activity of acetanilides, CDAA, and atrazine	157
Soil incorporated herbicides, for johnsongrass control in corn	474
Soil, measurement and prediction of picloram disappearance from	549
Soil-plant-water interactions, with terbacil	451
Soil profile analysis, for puncturevine fruit and seed	504
Soil properties, effects on fluometuron-disulfoton interactions	275
Soil, toxicity of an UHF device to plant seeds in	161
Soil water and growth, of rice and weeds	61
Soils, degradation of dicamba, picloram, and phenoxy herbicides in	556
Soils, dissipation of dicamba from	393
Sorghum, reducing herbicide injury to	531
Sorption of herbicides, by plant cells and protoplasts	145
Sowthistle crosses, herbicide response and morphology of	189
Soybean, assessment of herbicide-induced growth inhibition of	455
Soybean cultivars, responses to propanil	279
Soybean, fate of picloram in	350
Soybean harvesting losses, influence of weeds on	520
Soybean seed, absorption of herbicides by	71
Soybean tolerance, to metribuzin	308
Soybeans, bromoxynil for control of cocklebur and wild sunflower in	103
Soybeans, johnsongrass control in	426
Soybeans treated with 2,4-D, 2,4-DB, and dicamba, evaluation of seedling progeny of	141
Soybeans, venice mallow competition in	89
Soybeans, weed control in	81
Sprays, drift of	405
Sprouting and growth, of purple nutsedge altered by benzyladenine	19
Sprouting, of yellow nutsedge tubers	501
Steriod-producing dioscorea species, weed control in new plantings of	263
Sugarbeet root losses, based on kochia densities	565
Sugar beets, absorption, translocation, and metabolism of pyrazon in	241
Sugarbeets, control of kochia in	110
Sugarbeets, weed control in	67
Sugarcane cultivars, tolerance to terbacil, fenac, and dalapon	139
Sunflower, penetration of 2,4-D into	115
Surfactant and pH, effects on herbicide behavior in woody plants	221
Surfactants, silicone	130
Suspension fertilizer compatibility, with atrazine	217

Sweet Spanish onions and weeds, competition between 436
Systems of weed control, for peanuts 176

T

2,4,5-T, absorption of 94
Tall bearded iris, chemical weed control in 258
Tall morningglory germination 443
Tall morningglory germination response, to herbicides and temperature 443
Tall morningglory seedlings, nitrate reductase profiles in 561
TCA for green foxtail control, wheat tolerance to 238
Temperature, influence on absorption, translocation, and metabolism of pyrazon in sugar beets 241
Temperature, response of tall morningglory germination to .. 443
Temperatures, cytological effects on corn 299
Temperatures, physiological effects on corn 296
Terbacil, tolerance of sugarcane cultivars to 139
Terbutryn, absorption and translocation of 440
Texas, dissipation of dicamba from grassland soils of 393
Tillage variable in corn, broadcast or banded atrazine plus propachlor with 106
Tolerance of soybean, to metribuzin 308
Tolerance of two sugarcane cultivars, to terbacil, fenac, and dalapon 139
Tolerance to atrazine, of proso millet 260
Tolerance to chloramben methyl ester, in cucumber 207
Tomato, diphenamid metabolism in 542
Tomato, metabolism of 2-(α-naphthoxy)-*N*,*N*-diethyl propionamide 11
Tomato parasitism by hemp broomrape, herbicide effects on 253
Tomatoes, relationship between trifluralin and phosphorus on 150
Toxicity of UHF device, to plant seeds 161
Translocation, of alachlor in yellow nutsedge 357
Translocation, of benazolin in wild mustard and rape species 48
Translocation, of herbicides in peas 16
Translocation of pyrazon in sugar beets, influence of temperature on 241
Translocation, of terbutryn and propazine 440
s-Triazine effects, on seed germination and hypocotyl hook opening 461
Trifluralin and phosphorus, effect on transplanted tomatoes .. 150
Trifluralin, delayed incorporation of 163
Trifluralin diffusion coefficients, prediction of 485
Trifluralin diffusion, in silt loam soil 480
Trifluralin, persistence in soil 285
Trifluralin, volatility and photodecomposition of 469
Trumpetcreeper, action and fate of 2,4-D and dicamba in ... 429
Tuber longevity, of yellow nutsedge 76
Tubers of yellow nutsedge, anatomy and sprouting of 501
